

COMPUTER-TO-PLATE UNDER \$1500

If you have a computer this economical robust package includes **EVERYTHING** you need to get your jobs to the press, and out, **FAST...**

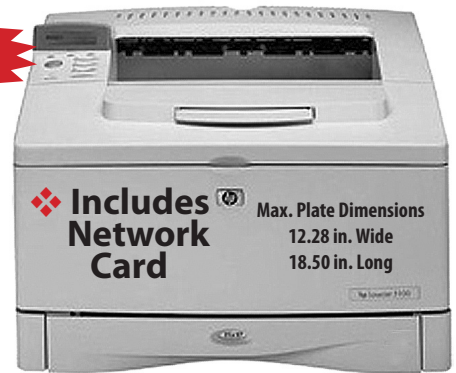

***Limited Availability • Call 800-341-6650 Today!**

HERE IS WHAT YOU GET:

❖ HP5100 PLATE IMAGING PRINTER

This is the last Hewlett Packard printer series made that could be customized to produce high quality laser plates. We refurbish these units with new component parts, and set them up for plate production. There are only so many of these sought after machines remaining, hence the limited availability. It is turbo-charged with **192MB** of memory; an **IMPORTANT FEATURE** that lets you output numerous halftones or screens easily, and will get you through most page images fast. Our Plate Imaging Printer carries a 90-Day Warranty.

**192MB
Memory!**

❖ BRAND NEW OEM TONER CARTRIDGE

Many laser plate users try to cut corners by using refurbished toner cartridges. Bad idea, since it is virtually impossible to seal them like a new one. Any toner leakage, however slight, will cause unwanted 'toning' on press. **NEW TONER** is an important part of laser plate performance.

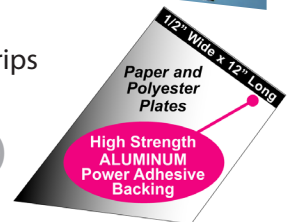

❖ FREE STARTER PACKAGE OF 100 LASER II PREMIUM PLATES

These superior plates have an improved coating that allows the toner to firmly adhere at lower temperatures. They can hold a wider range of halftone dots, and will run up to 10,000 impressions under proper press conditions. Used properly, the LASER II plates can approach the ease and quality of metal CtP plates.

❖ PACKAGE OF 100 PLATE BACKING STRIPS (MS6402)

Polyester based laser plates do tend to stretch on the press. These special aluminum backing strips will eliminate plate stretch allowing you to run close register multi-color jobs.

❖ 1 GALLON OF UNIVERSAL PINK FOUNTAIN CONCENTRATE (GUP-150)

A terrific all-around fountain solution that also happens to be the best for running Laser II plates. Use it on all size presses. Results in remarkably brighter and sharper colors with less dot gain. Non-toxic, mild odor, helps prevent calcium build-up. One gallon makes 32 gallons solution.

❖ 1 QUART LASER PLATE PREP/CLEANER (LPC-1100)

Best solution available for cleaning up laser plates on the press. Just wipe down to eliminate toning trouble. Will not affect image area. Easy to use and compatible with other chemicals.

❖ 1 LASER IMAGE DELETION PEN (PDP-101)

For easy correction of mistakes and minor errors. Can be worth its weight in gold when it saves you the trouble of a plate make-over during a big rush order!
